

Profile

KKR Bose Design Services is one of the leading providers of engineering solutions, website design & digital marketing services in India. Since our inception, we have been committed to offering top-notch quality services at competitive market rates across all sectors and industries. Our services are currently being availed by various companies all over in India. The long track record of successfully completing project within the scheduled time has helped us create a stellar reputation of ourselves and it is our aim to become the market leaders in the near future.

We are backed by a really dedicated and talented team of professionals who are well-versed in the fields of engineering and online marketing. From design engineers proficient in cutting-edge CAD system to digital marketers experts in SEO, SMO, PPC and more, our team of professionals is what you need to cruise you into success. Whether you want a 3D walkthrough of your construction project, help with product design and development, 2D drawings and 3D models of your project or a responsive website to showcase your business to the mass, via the Internet, we have got all your needs covered.

At KKR Bose Design Services, we have years of experience and expertise in delivering cost-effective and premium quality solution for all your drafting, technical and digital needs. Our mission is to offer complete value to our customers by providing them with engineering and related services using the very latest technology and software.

To join hands with us, get in touch.

Vision

To achieve the needs of the customers, as them to reach to the right market.

Our Aim

KKR helps to achieve the customers to drive their technology towards their best future needs.

Engineering Services

We are one of the leading engineering services companies in India capable of offering end-to-end solutions to our clients. Backed by the commitment and support of our impeccable team of experts and access to cutting-edge technology, we are confident that we can take care of your project-related needs from the start through to the completion.

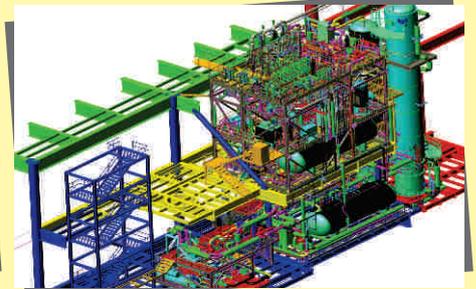

We Provide a Comprehensive Range of Engineering Services.

From plant design to process design and product design & development, we are proficient to cover every aspect of your project. Whether you want 2D plant design or 3D, we have the required resource, equipment and tools to accommodate your specific requirements. We also offer engineering documentation outlining the process to make it easier for you. If you are looking for engineering services in India for the development of your product, our professionals are eager to have a chat.

KKR Bose Design Services is one of the top-rung engineering services companies in India with long years of experience and a track record of success. Contact us to discuss your project in detail.

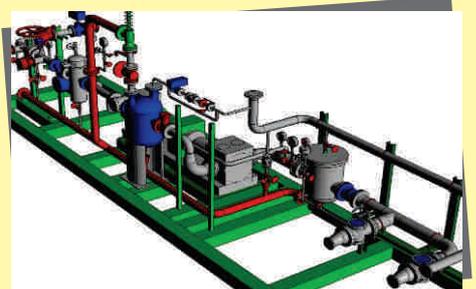

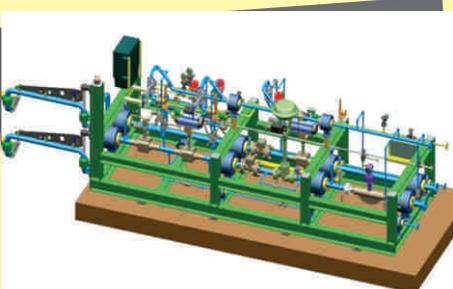

▶ Plant Design Services

KKR Bose Design Services is one of the top-rung names in the plant engineering service industry. We are dedicated to helping EPC contractors, plant owners, equipment suppliers and consulting firms in expediting project delivery and minimizing design risks. As one of the premier engineering services companies in India, we have years of experience and expertise in the development of digital design information for piping, process, structural and mechanical engineering functions for tailored plant design requirements.

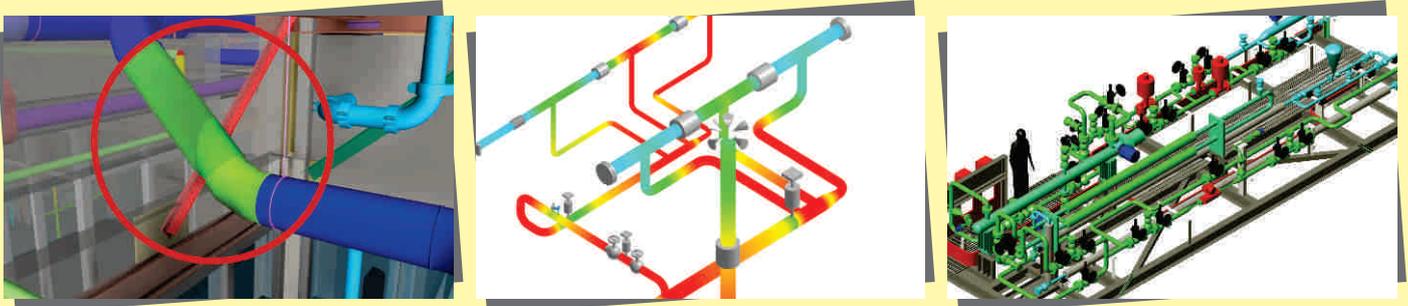

▶ Process Design Services

At KKR Bose Design Services, we specialize in offering an integrated range of process design and engineering services in India. Our end-to-end solutions are highly-revered for extraction, distillation, reaction, absorption, separation and such other unit operations. Equipped with avant-garde technology and an impeccable team of professionals, we have carved a niche as one of the most trustworthy providers of process design services.

► Piping Design

KKR Bose Design is a fast growing and rising company in the dynamic field of Piping Technology . We are Specialized in Design and Engineering (Specification and Materials) of Piping and Pipeline Projects. We are a team of experienced Piping, Process and Civil Engineers, Instrumentation Engineer, Electrical Engineer & Mechanical Engineer. In addition, we also have a bank of expert engineers with highly experienced to tap into for any advanced and critical subject matter expertise. We ensure that resources are optimally utilized at every stage of our process by providing client with best value for their investment.

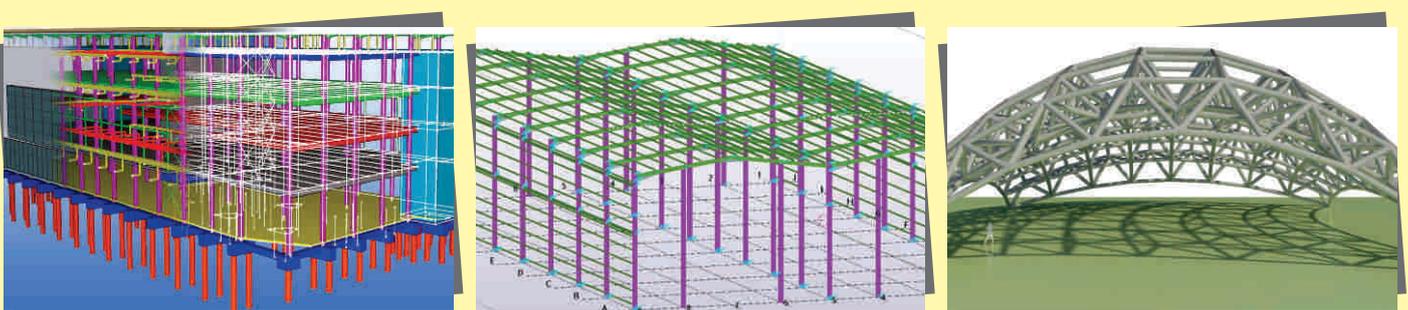

► Structural Design

At **KKR BOSE DESIGN Services**, we render comprehensive structural design services in Indiato MEP engineers and architects. We closely work with them to help them efficiently design and analyze at economical rates. We also offer structural and MEP facility engineering solutions to industrial and commercial contractors, architects and owners.

Since our inception, we have been assisting steel fabricators, EPC firms and contractors in erecting facilities that showcase immense strength. Plant owners and sheet metal fabricators rely on us for the development of 3D CAD models and 2D drafts for metal structural elements like, cladding, glazing, enclosures and more. We help them in enhancing their productivity.

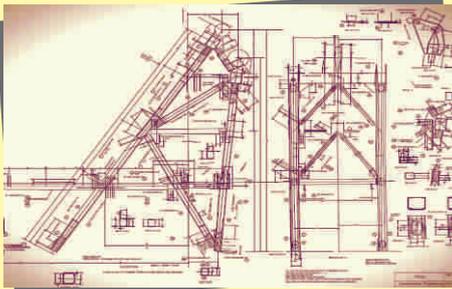

Our dynamic team of local structural engineer and designers are capable of delivering detailed plans for roofs, angle section, columns, trusses, foundation and such other vital structural element of a building. Owing to our deep knowledge and hands-on expertise with detailed structure design, we are able to offer faultless structural designs.

If you are looking for structural engineering companies in India, **KKR BOSE DESIGN Services** is worth considering. The success of our past projects speaks volumes about our dedication, capabilities and quality of work. Talk to one of our professionals to discuss your project in detail. We will provide you with an obligation free estimate.

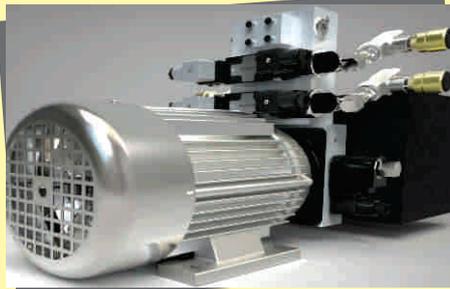

Mechanical Design Services

KKR BOSE DESIGN Services, one of the top-notch mechanical design service providers in India, is focused on offering end-to-end mechanical design services across the product development life cycle. We are the go-to solution provider in India when it comes to the product design and development of mechanical engineering services. Thanks to our excellent team, we are capable of covering a comprehensive terrain including conceptual mechanical engineering design to production. We also have a sturdy and robust product development effort in place that makes sure quick design, decreased cycle times and improved ROI.

CAE Services

KKR Bose Design Services offers computer aided engineering analysis (CAE) services in India at competitive market rates. Our CAE services mainly comprise of analysis and assessment of the performance and robustness of different types of engineering assemblies, components and structures. Our team of professionals render validation, simulation and optimization of engineering products and tools. Through our CAE services, we greatly assist design teams in decision making. We have experiences in analyzing both simple and complicated structures.

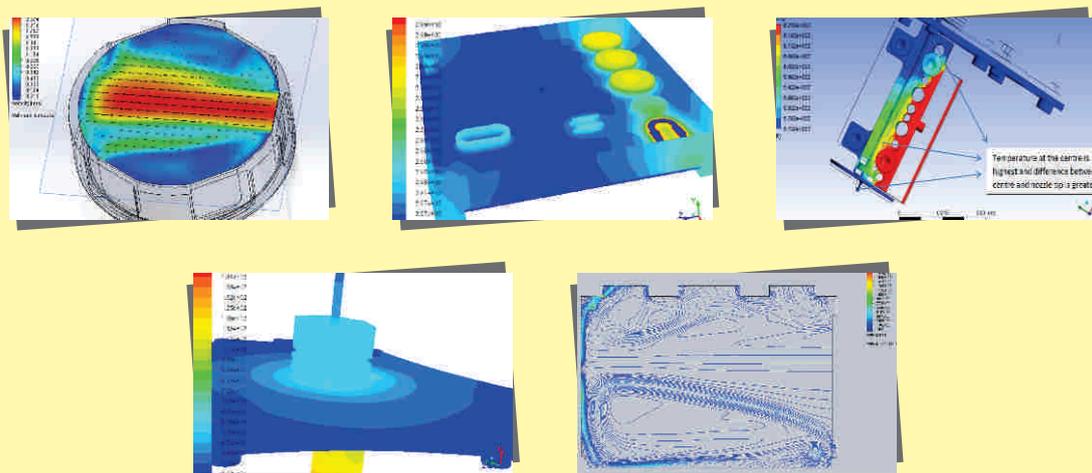

► Finite Element Analysis (FEA):

Our experience in engineering analysis is demonstrated through our FEA services. Our FEA solutions validates the materials used, design approach and ultimately simulates the product in use. We utilize analysis software, 3D models and theoretical deductions to conduct finite element analysis on your products or designs.

► Computational Fluid Dynamics (CFD) And Thermal:

Our highly-qualified team of engineers carries out CFD service for our esteemed customers who want to study the effects of fluid flows, as well as, their reactions under different operating situations. We make use of computer modeling and simulation to enhance our customers' understanding of the products they have designed and produced. Our CFD solutions offer customers with deep insight into the design of the system, ability to apply varied pressures, temperatures and such other operating conditions. We provide our customers with solutions to resolve problems faced due to flow analysis.

► NDT Services

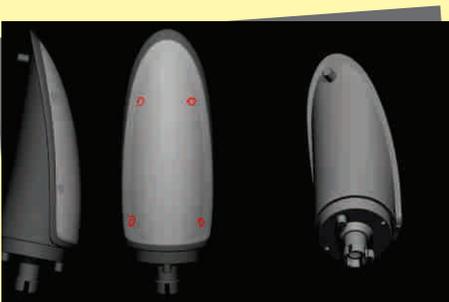

KKR Bose Design Services works with a team of professionals certified in the field of NDT and inspection with access to state-of-the-art equipment. We are proficient in offering non-destructive testing, inspections and testing throughout India. With the dedicated support of a strong team of professionals, we guarantee to deliver accurate examination results to our clients.

As an innovative, modern and progressive company, we strive to provide our customers premium quality services that exceed expectations. Our NDT services include the use of top-notch test methods for examining a material, an object or system without impairing the future usefulness. We use NDT to test the material integrity of a test object.

► Product Design & Development Services

At KKR Bose Design Services, we are specialists in the process of visualizing and crafting concepts and specifications that optimize the function, form and value of products. We offer turnkey solutions when it comes to product design and development. Our team of professionals oversees the entire project and implements the concepts to create tangible 3D products. We predominantly base our product design & development and engineering services in Pune on CAD-based tools. We make sure to give life to your concept and bring your product to the market.
